PROFESSIONAL SUMMARY

Information Technology student (Computer Forensics, CGPA 3.85) with hands-on experience in IT support, hardware/software troubleshooting, network diagnostics, and virtualization, plus a CompTIA Security+ certification. Seeking an IT Internship to apply and grow technical skills across IT operations, infrastructure, systems support, networking, and cybersecurity in a professional environment.

WORK EXPERIENCE

Building Automation (BAS) Technician — Pavilion Sdn. Bhd. *May 2023 – Jun 2024*

- Investigated HVAC downtime across a multi-tenant commercial site by monitoring temperature sensors, controllers, and monitoring panels, and diagnosing faults before escalation.
- Investigated system alerts and connectivity failures, and documented recurring issues and root causes for the facilities team.
- Prepared diagnostic and incident reports to document recurring HVAC and network-related issues.

IT Support & Helpdesk — Qorva Technology Sdn. Bhd. *Jan 2022 – Jan 2023*

- Maintained consistent system uptime by logging, tracking, and resolving first-line hardware, software, and connectivity tickets in Zendesk.
- Configured, maintained, and provided technical support for the Sun Life insurance application used by CIMB employees, including setup, updates, and troubleshooting. Reduced recurring fault tickets through scheduled preventive maintenance checks across end-user devices.
- Resolved LAN/WAN and TCP/IP connectivity issues to maintain stable daily operations.

Technician, Audio Visual & Electrical/Mechanical/Civil — Shardu Enterprise Sdn. Bhd. (Hotel Maluri) *Nov 2019 – Sep 2021*

- Delivered reliable event support by setting up and operating PA and audio-visual systems for hotel functions and events.
- Maintained uninterrupted hotel operations by handling electrical, mechanical, and civil maintenance tasks across the building.

Building Maintenance Technician — Operasi Jitu Sdn. Bhd. (MRT Taman Midah) *Jun 2018 – Jul 2019*

- Ensured building system reliability by attending to and following up with subcontractors on fire alarm, parking machine, and electrical systems.
- Reduced unresolved defects by monitoring CCTV, computers, servers, and parking sensors and reporting faults for prompt resolution.

Technical Field Support — Antah Schindler Sdn. Bhd. *Aug 2017 – May 2018*

- Installed and upgraded elevator system software, controllers, and diagnostic tools across multiple sites.
- Detected irregularities before failure by analyzing monitoring logs and performance data.
- Maintained safety compliance through routine operational inspections.

Technician ACMV — Extechpro (M) Sdn. Bhd. *Mar 2014 – Jul 2016*

Site: KLCC Petronas Tower 3

- Checked and recorded heat exchanger and temperature readings each morning, and led daily tools-box safety briefings.
- Maintained chiller water pump pressure, split units, fan coil units (FCU), cassette units, and air-handling units (AHU), including VSD and BCS-integrated VAV systems.

PROJECT

BocorCheck — OSINT-Based Personal Data Exposure Monitoring & Risk Analysis System

Final Year Project, UNIRAZAK (Bachelor of IT – Computer Forensics)

- Delivered a tiered (Low/Medium/High/Critical) breach-risk scoring system by building an OSINT pipeline against the Have I Been Pwned (HIBP) API with a Python (Flask) and MySQL backend.
- Enabled real-time breach alerting for end users by integrating a Telegram bot into the risk-monitoring pipeline.
- Preserved 100% user-data privacy by integrating a local LLM (Ollama) to generate personalized mitigation guidance without third-party data transmission.
- Validated system reliability through structured Agile SDLC development and formal user acceptance testing (UAT).

EDUCATION

Bachelor of IT (Computer Forensics), Hons — UNIRAZAK *2024 – Present*
CGPA: 3.85

Sijil Akademi Binaan Malaysia (ACMV), Level 1–3 *2014 – 2016*

CERTIFICATIONS

- CompTIA Security+ (SY0-701) — 2025
- Construction Personnel Registration (Green Card) — CIDB Malaysia
- Social Engineering & Phishing in the Age of AI — 2025
- Java — LearnQuest — 2025
- UC Hardware and Software — 2024
- Cybersecurity Awareness — 2024
- APEL T6 — 2024

TECHNICAL SKILLS

Security & Forensics: OSINT Techniques, Risk Assessment, Access Control Awareness, System/Log Monitoring
Forensics & Security Tools: Wireshark, Autopsy, FTK Imager, Nmap, Volatility, ALEAPP/iLEAPP, Sherlock, SpiderFoot, Maltego
Networking: LAN/WAN Fundamentals, TCP/IP, Network Diagnostics, Connectivity Troubleshooting
Operating Systems: Windows, Ubuntu, Kali Linux
Virtualization: VMware, VirtualBox
Development: Python (Flask), MySQL, Basic Java

LANGUAGES

Bahasa Malaysia (Native) | English (Professional Writing, Conversational Speaking)
